

STRIPS OUTDOORPRO+

1

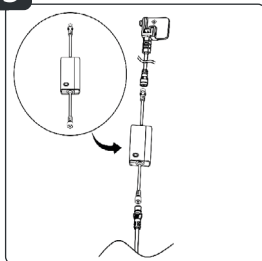

Controleer allereerst of alle onderdelen aanwezig zijn. Voor het aansluiten van de verlichting heb je ook een push dimmer nodig (niet standaard meegeleverd, maar noodzakelijk voor gebruik).

2

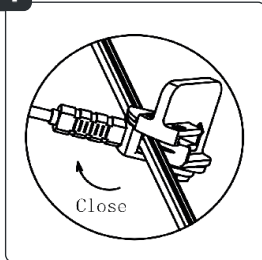

Positioneer de strip op de gewenste locatie. Indien nodig kan de strip ingekort worden. Sluit het ingekorte uiteinde af met de meegeleverde afsluitdop.

3

Verbind het koppelstuk van de strip nu met de push dimmer. Verbind vervolgens de push dimmer met de connector productkabel.

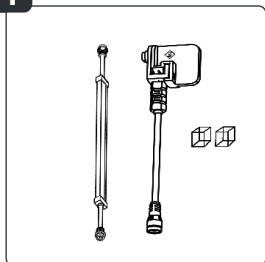

4

Klik de connector productkabel vast aan de hoofdkabel. Je verlichting is nu klaar voor gebruik.

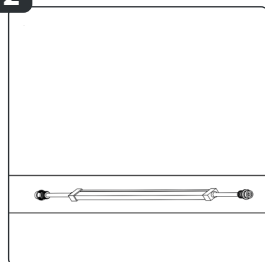

STREIFEN OUTDOORPRO+

1

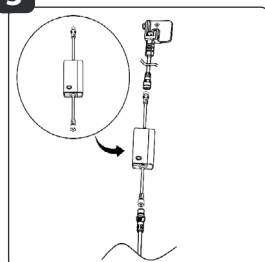

Prüfen Sie zunächst, ob alle Teile vorhanden sind. Für den Anschluss der Beleuchtung benötigen Sie zusätzlich einen Push-Dimmer (nicht standardmäßig im Lieferumfang enthalten, aber für die Verwendung erforderlich).

2

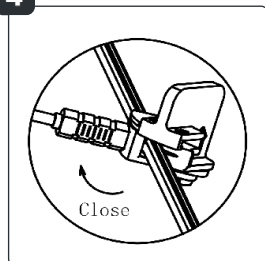

Positionieren Sie den LED Strip an der gewünschten Stelle. Bei Bedarf kann der Strip auf die gewünschte Länge gekürzt werden. Verschließen Sie das gekürzte Ende mit der mitgelieferten Endkappe.

3

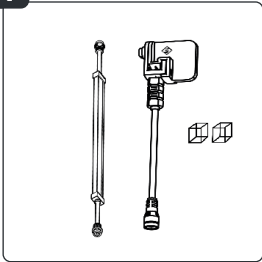

Verbinden Sie nun den Steckverbinder des LED Strips mit dem Push-Dimmer. Verbinden Sie anschließend den Push-Dimmer mit dem Produktkabelverbinder.

4

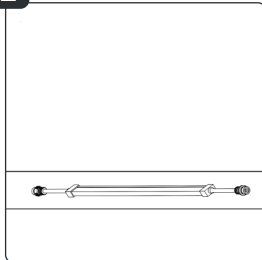

Klicken Sie den Produktkabelverbinder am Hauptkabel fest. Ihre Beleuchtung ist nun einsatzbereit.

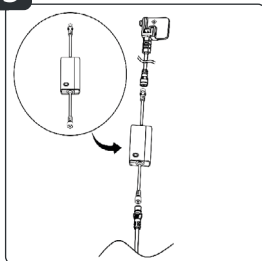

STRIP LIGHTS OUTDOORPRO+

1

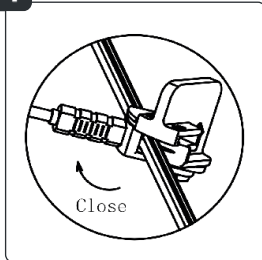

First, check that all parts are included. A push dimmer is also required to connect the lighting (not included as standard, but required for use).

2

Position the LED strip in the desired location. If necessary, the strip can be cut to the desired length. Seal the cut end with the supplied end cap.

3

Now connect the LED strip connector to the push dimmer. Then connect the push dimmer to the product cable connector.

4

Click the product cable connector securely onto the main cable. Your lighting is now ready for use.
